main.py

```python
import shutil

# Define file paths
source_file = 'source.txt'
destination_file = 'destination.txt'
append_file = 'append_file.txt'

# 1. Open, Write, and Read from a File
try:
    # Open file in write mode to add content
    with open(source_file, 'w') as file:
        file.write('This is the original content.\n')
        file.write('Adding some more text.')

    # Open file in read mode to read the content back
    with open(source_file, 'r') as file:
        content = file.read()
        print("Read content from source file:")
        print(content)

except IOError as e:
    print(f"Error opening/reading file: {e}")
```
